01

THE ASSET CLASS IN BRIEF

How capital is raised

Real estate is raised against the assets. The case rests on the plan for each one.

Real estate allocators underwrite buildings before they underwrite people. A committee will read the rent roll, the lease expiry profile, the debt schedule and the exit cap rate before it spends long on the track record summary. Managers who raise well present each strategy, from core through opportunistic and ground-up development, as a set of asset business plans that an investor can test line by line.

Strategy labels carry precise expectations. Core means stabilised, well let, modestly geared property held for income. Core-plus adds light lease-up or refurbishment. Value-add buys vacancy, capital expenditure or repositioning. Opportunistic and development take entitlement, construction and leasing risk for a higher return target. A manager whose gearing, holding period or return target does not match the label it uses will lose credibility in the first meeting.

The vehicle matters as much as the strategy. Closed-end funds suit value-add and opportunistic programmes with a defined harvest period. Open-end funds suit core income and offer liquidity through a redemption queue. Separate accounts, programmatic joint ventures and single-asset co-investments let large allocators choose assets themselves. We help sponsors match the vehicle to the investor base they can credibly reach.

STRUCTURE	STRATEGIES	INVESTORS	BASIS OF THE CASE
Closed-ended or open-ended fund, joint venture, or single-asset vehicle.	Core, value-add, opportunistic and development.	Pensions, insurers, sovereign funds, family offices, private wealth.	The assets, the market and the business plan for each.

WHO INVESTS

Pension funds	Insurers	Sovereign wealth funds	Family offices	Private wealth platforms

VEHICLES AND FUND LIFE

02 Real estate vehicles and who funds them

VEHICLE	STRUCTURE	LIFE OR LIQUIDITY	WHO ANCHORS	USED FOR
Closed-end fund	Limited partnership with commitments drawn over an investment period, then assets sold and proceeds distributed.	Eight to ten years plus extensions	Pension plans, insurers and endowments	Value-add, opportunistic and development programmes with a defined business plan and exit.
Open-end evergreen fund	Perpetual vehicle priced at appraised NAV, with quarterly subscriptions and redemptions through a queue.	Quarterly liquidity, subject to queue and gates	Defined benefit plans and core allocators	Stabilised core and core-plus income portfolios benchmarked against a diversified core index.
Separate account	Single-investor mandate with its own guidelines, approval rights and reporting, managed by the sponsor.	Set by mandate, often open-ended	Sovereign funds and the largest pensions	Large allocators wanting control over asset selection, gearing, sector weights and exit timing.
Programmatic joint venture	Investor and operator agree a pipeline target, with each asset approved into a shared venture.	Per asset, usually three to seven years	Sovereign funds, insurers and large pensions	Building sector platforms with a specialist operator, such as logistics, residential or student housing.
Co-investment vehicle	Side vehicle alongside the main fund on a specific deal, usually lower fees and promote.	Matches the underlying asset hold period	Existing fund investors and family offices	Lowering blended fees and adding concentrated exposure to assets the investor already understands.
Single-asset JV	Sponsor contributes a minority stake and operates; a capital partner funds most equity.	Business plan horizon, typically three to five years	Family offices, private wealth and insurers	First-time sponsors, recapitalisations and developments too concentrated for a commingled fund.

HOW A REAL ESTATE RAISE RUNS

1

Strategy and pipeline

Define sector, geography, risk band and gearing policy, supported by identified or seed assets under control.

2

Materials and room

Prepare deck, track record by deal, asset business plans, rent rolls, valuations and debt schedules.

3

Anchor, first close

Secure an anchor with economics or rights, then hold first close so acquisitions can begin.

4

Subsequent closes

Add investors over twelve to eighteen months, equalising later entrants and showing deployment against plan.

5

Deploy and report

Acquire, execute business plans, report NAV, NOI and leasing quarterly, then prepare the next vintage.

THE MARKET TODAY

03 Real estate is the most crowded category in the market.

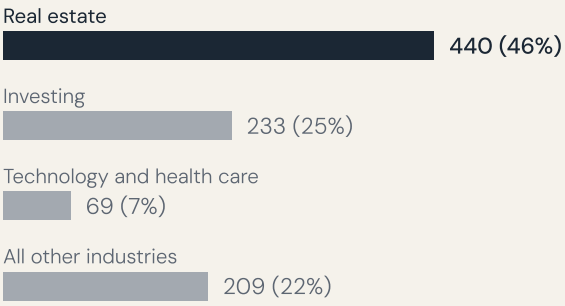

440
Of the 951 open private offerings of US$50 million or more are in real estate

46%
Real estate share of those open offerings, the largest of any industry

11%
Real estate share of Gulf sovereign deployment by value in 2026, 5% by number of deals

OPEN OFFERINGS OF US$50 MILLION OR MORE, BY INDUSTRY

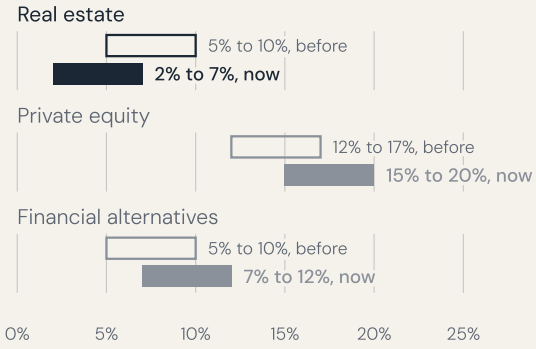

Real estate accounts for nearly half of open raises.

Source: SEC EDGAR Form D filings, twelve months to July 2026. Inaya Advisory analysis. Amounts are as reported on each issuer's most recent Form D and can lag what has been raised.

ADIA LONG-TERM ALLOCATION RANGES

More room for private equity and hedge fund strategies, less for real estate.

Source: ADIA 2025 Review, as reported by The National, September 10, 2026, and Enterprise, September 11, 2026.

WHAT IT MEANS FOR A RAISE

A raise in a crowded category needs to state plainly what separates it from the others in front of the same committee.

Gulf deployment: Khaleej Times, October 1, 2026, citing Global SWF's 2026 Mena Playbook. Deployment figures include direct investments and are not limited to fund commitments. Figures are as stated by the sources at the dates given. Inaya Advisory is not affiliated with any institution named here.

MARKET DATA

Private Real Estate in figures

US$222.2bn

Capital raised by private real estate funds globally in 2025, the first annual increase since 2021.

PERE, Fundraising Report Full Year 2025, January 2026

25 months

Average time on the road for private real estate funds that closed in 2025.

PERE, Fundraising Report Full Year 2025, January 2026

04

ALLOCATORS

Metrics real estate committees test

Realised vs unrealised

Returns from assets sold and cash distributed, set apart from returns still resting on appraised values.

WHAT ALLOCATORS LOOK FOR

A meaningful realised record by vintage, and unrealised marks that hold up against recent comparable sales.

Gross to net spread

The gap between asset-level returns and investor returns after fees, promote, fund costs and cash drag.

WHAT ALLOCATORS LOOK FOR

A spread explained line by line, and net figures shown alongside gross in every track record table.

Entry and exit cap

Purchase price expressed as a yield on NOI, and the yield assumed when the asset is sold.

WHAT ALLOCATORS LOOK FOR

Exit caps at or above entry caps unless the business plan clearly changes the asset quality.

NOI growth

Change in net operating income from rents, occupancy and expense control after property operating costs.

WHAT ALLOCATORS LOOK FOR

Growth tied to signed leases, market rent evidence and capital spend, with cap rate compression treated as upside.

Occupancy and WALT

Share of space let, and the weighted average unexpired lease term across the tenant base.

WHAT ALLOCATORS LOOK FOR

Lease expiry concentration, tenant credit, renewal probability and the downtime and incentives assumed at rollover.

Gearing policy

Loan to value limits, debt maturity profile, fixed versus floating mix and hedging approach.

WHAT ALLOCATORS LOOK FOR

Fund and asset LTV caps, no maturity wall, hedged floating debt and covenant headroom under stress.

Development and leasing risk

Exposure to construction cost, entitlement, delivery delays and speculative space without signed tenants.

WHAT ALLOCATORS LOOK FOR

Caps on development exposure, guaranteed maximum price contracts, pre-leasing thresholds and contingency budgets.

NAV and benchmark

How assets are valued, by whom and how often, compared with a peer index such as ODCE or INREV.

WHAT ALLOCATORS LOOK FOR

Quarterly independent appraisals, consistent methodology, and returns placed fairly against the relevant core or style index.

DILIGENCE

05 What institutional allocators examine

01
The assets and the plan
For each property or pipeline, the business plan, the capital required, and the assumptions behind the projected return.

02
Market and sector
Why this sector and this location, the balance of supply and demand, and how the plan holds if conditions change.

03
Execution record
What the sponsor has bought, built or repositioned before, at what scale, and how the results compared with the original plan.

04
Alignment and governance
How much the sponsor invests alongside investors, how the fees and the sponsor's share of profits are set, and who decides on purchases and sales.

Asset business plans
Allocators rebuild the underwriting for each asset: purchase price, capital expenditure budget, lease-up timetable, rent growth, hold period and exit cap. They compare the plan at acquisition with what happened, and they look for a manager who explains variances openly rather than reworking the base case after the event.

Track record attribution
Committees want returns by deal, vintage, sector and strategy, split between income, NOI growth and cap rate movement. A record built mostly on yield compression in a falling rate period is treated with caution. Attribution that shows operating gains survives the questioning far better.

Debt and hedging
Diligence teams read every loan agreement summary: lender, rate basis, hedge terms, maturity, extension options, covenants and recourse. They test refinancing at current rates and lower values. Concentrated maturities, unhedged floating debt or cross-collateralised facilities without a clear rationale slow committees down considerably.

Valuation process
Investors check who appraises the assets, how often, what discount rates and exit yields are used, and whether the manager can override the appraiser. They compare marks with recent transactions in the same submarket and ask how quickly the portfolio was written down when values fell.

Operations and platform
For value-add and development, allocators examine in-house asset management, leasing, construction oversight and property management, or the quality of third-party operators. They want named teams, budgets and controls for capital projects, and evidence that the manager can execute the business plan it is selling.

ESG and building condition
Environmental site assessments, building condition reports, energy ratings and capital expenditure for decarbonisation are now standard requests. Many European and Gulf allocators ask how older stock will meet tightening efficiency rules, and how that spend is reflected in the underwriting and exit value.

WHO THE CAPITAL SERVES

Real estate capital pays for buildings to be bought, built and improved.

06

INVESTORS

The investor map

ALLOCATOR	HOW THEY DECIDE	WHAT THEY WANT
Public pension plans	Consultant-led, pacing models by risk band, with core held in open-end funds and higher risk in closed-end.	Style consistency, benchmark-relative net returns, clean reporting and fees that reflect the size of their commitment.
Insurers	Driven by liability matching and capital charges, with strong preference for income and senior positions.	Stable cash yield, low gearing, long leases, credit-worthy tenants and structures that suit their regulatory capital.
Sovereign wealth funds	Direct teams approve large tickets, often through separate accounts or programmatic joint ventures.	Scale, control rights, sector platforms, co-investment access and a partner that can deploy their capital at pace.
Endowments and foundations	Small investment teams that back specialist managers in niches where larger platforms do not compete.	Differentiated sourcing, opportunistic return targets, sector expertise and alignment through meaningful GP commitment.
Family offices	Principal-led decisions, often quick, with preference for assets they can see and understand.	Deal-by-deal visibility, co-investment, regular income, local market knowledge and direct access to the principals.
Private wealth platforms	Gatekeepers and research teams select semi-liquid vehicles for advisers to place with clients.	Monthly or quarterly liquidity, distribution yield, NAV discipline and a brand that advisers can explain to clients.

GULF SOVEREIGN CAPITAL

Gulf sovereign and quasi-sovereign investors are long-standing, large-ticket buyers of private real estate, and most prefer control over pooled exposure. Large institutions typically deploy through separate accounts, programmatic joint ventures with sector operators and direct co-investment, using commingled funds for access to new sectors or regions. Committees value income, prime locations, logistics, residential and hospitality, alongside long relationships with managers who bring repeated deal flow and treat them as partners.

FAMILY OFFICES

Single and multi-family offices often treat real estate as their home asset class, having built wealth through property. They tend to favour deal-by-deal participation, single-asset joint ventures and co-investments over blind pools, because they want to see the building, the rent roll and the exit. Decisions can be quick when the principal is engaged. Income, sensible gearing, local operating knowledge and transparent sponsor economics carry more weight than index-relative returns.

07

IN THE MARKET

Why raises stall, and what fixes them

	WHY IT STALLS	WHAT FIXES IT
1 Track record rests on cap rate compression	Gains came from falling yields rather than operations, so committees doubt the manager can deliver returns in a flat or rising rate market.	Attribute returns to income, NOI growth and yield movement, and lead with deals where operating work clearly created the value.
2 Marks look stale against transactions	Appraised values lag recent sales, so new investors fear buying into an overvalued NAV in an open-end fund.	Show appraisal methodology, recent write-downs, comparable sales evidence and, where needed, offer entry at a discount or a fresh valuation.
3 Debt maturities cluster in the near term	Refinancing at current rates and lower values may require new equity, so investors suspect their capital will repair the old portfolio.	Publish the maturity schedule, extension options, hedges and refinancing plans asset by asset, with stressed outcomes at current rates.
4 No anchor and no seed assets	Without committed capital or identified assets, investors cannot see deployment, so each one waits for another to move first.	Secure an anchor with fee or governance rights, warehouse one or two seed assets, and show the pipeline under exclusivity.
5 Strategy drift between label and plan	A fund called core-plus holding development, or value-add with opportunistic gearing, fails consultant screens on style consistency.	Set clear limits on gearing, development exposure and sector weights in the documents, and report against those limits every quarter.

TERMS THE MARKET LOOKS AT

Management fee base

Whether fees run on committed or invested capital, how they step down after the investment period, and how NAV-based fees work in open-end vehicles.

Transaction fees

Acquisition, disposition, development and financing fees charged by the manager, and whether these offset the management fee or add to it.

Promote and waterfall

Preferred return, catch-up, promote tiers, whole-fund versus deal-by-deal distribution, and clawback protection so investors keep their preferred return first.

GP co-invest

The size of the sponsor commitment, whether it is cash or fee waiver, and how it compares with the personal wealth of the principals.

Key person

Which named individuals must remain dedicated to the fund, the time commitment required, and what suspension of investment follows a departure.

Open-end redemption terms

Notice periods, quarterly redemption limits, queue priority, gating rights, lock-ups for new capital and how pricing applies to exiting investors.

Terms are described as general practice in the market. They vary by manager, strategy and allocator, and nothing here states our own fees.

PREPARATION

08 Materials and data room checklist

Private real estate capital follows managers who can show income, control and a credible exit, asset by asset.

Fund and track record

- [ ] Deal-level track record with gross and net returns
- [ ] Return attribution by income, NOI growth and yield
- [ ] Realised and unrealised split by vintage
- [ ] Draft LPA, side letter terms and fee model
- [ ] Team biographies, key person and succession plan

Asset-level files

- [ ] Business plan and underwriting model per asset
- [ ] Current rent roll with lease expiry schedule
- [ ] Tenant credit summaries and arrears reports
- [ ] Capital expenditure budget and progress to date
- [ ] Operating statements and NOI history by asset

Valuation and debt

- [ ] Third-party appraisals for each asset, latest quarter
- [ ] Valuation policy and appraiser rotation schedule
- [ ] Debt schedule with lenders, rates and maturities
- [ ] Hedging summary, covenants and headroom tests
- [ ] Refinancing plan with stressed interest rate cases

Technical and compliance

- [ ] Phase I environmental site assessments
- [ ] Building condition and structural survey reports
- [ ] Energy ratings and decarbonisation capital plan
- [ ] Title, zoning and planning or entitlement status
- [ ] Insurance schedule and claims history

09

ON A MANDATE

How we run a mandate

The raises that close are prepared before any investor sees them.

A mandate runs in eight stages. Most of the work that decides it happens before any investor sees the materials, and the relationships it opens continue after the close.

1 The First Conversation

A call with our Client Advisor about the strategy or the assets, the target size and the timeline. You leave with a first read on how allocators are likely to receive it.

2 Senior Review

Our senior team reviews the assets, the business plan, the materials and the proposed terms. You then know whether we would take the mandate and what we would change first.

3 Positioning

We prepare the materials around the questions a real estate investment committee asks about the assets, the business plan, the market and the sponsor's record.

4 Our Network

The raise goes first to the pension funds, family offices, endowments and institutions we work with whose real estate allocation fits the strategy and the size of the raise.

5 Meetings and Diligence

We prepare each investor meeting with you and attend the ones that decide the outcome. Diligence questions are answered as they arrive, so the process does not stall between meetings.

6 Terms and Close

We stay in the conversations through indications of interest, final terms, joint venture agreements and side letters, until the capital is committed.

7 Wider Reach

If our network does not cover the full raise, we approach further investors selected for it, with an approach written for each and the same preparation behind every meeting.

8 Investor Relations

After the close, we keep in regular contact with the investors we introduced, so the next fund or the next asset starts with investors who already know you.

10

THE FIRM

Our services

We work on equity raises only.

Inaya Advisory works with fund managers, sponsors, founders and private wealth principals. Every mandate is run by the people who accepted it, and every engagement is qualified before it begins.

8 stages	US$100 million to several billion	North America, Europe and the Gulf
IN EVERY MANDATE	SIZE OF RAISE	INVESTOR COVERAGE

01

Capital Raising Mandates

A full mandate from positioning to final close. The raise goes to our network first, in the order most likely to bring early commitments.

02

Investor Relations

Investor relationships kept working after the close and between raises. Offered after a mandate or on its own.

03

Targeted Introductions

A personal introduction to a specific investor whose mandate fits, for a raise that is already prepared and in market.

04

Mergers & Acquisitions

Advice to founders, families and principals on a full exit, a succession or the sale of a minority stake.

05

Positioning & Materials

The deck, the track record, the data room and the terms, prepared as an investment committee will read them.

06

Investment Committee Review

Our senior team reviews the raise the way an investment committee will, finds what an allocator will challenge and fixes it before diligence.

11

THE PEOPLE

The people who run the mandate

David Hunter

SENIOR ADVISOR

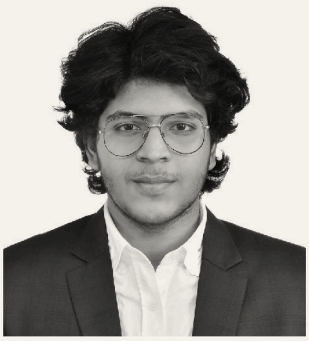

Close to forty years in institutional capital, including as Executive Director and Chief Investment Officer of the North Dakota and the US$40 billion Texas Municipal retirement systems.

Anas Ansar

MANAGING PARTNER

Runs each mandate from the first review of a raise to its final close. Leads origination and senior review with David Hunter, signs each engagement on the firm's behalf, and leads investor relations after the close.

Shayan Mohammed

MANAGING DIRECTOR

Leads the firm's investor coverage across North America, Europe and the Gulf, and decides which investors each mandate reaches, in what order, and when the first introductions are made.

Abbas Chothia

CLIENT ADVISOR

Leads the firm's client conversations, through to an engagement confirmed in writing. Over two decades across principal-level advisory, deal execution and company building.

WHO LEADS EACH STEP

	First conversation	Senior review	Proposed approach call	Positioning and materials	Order of investors	First introductions	Meetings to close	Engagement signed	Investor relations
David Hunter	·	●	●	●	·	●	●	·	●
Anas Ansar	·	●	·	●	·	·	●	●	●

~40

Years in institutional capital for David Hunter, twenty-four of them in banking

2

US public pension systems he served as Executive Director and Chief Investment Officer

US$40bn

Texas Municipal Retirement System

Roles are as described on inayaadvisory.com. Career figures are from David Hunter's earlier roles and are not transactions of Inaya Advisory.

CONTACT

To discuss a mandate

Every mandate is reviewed before it is accepted, and our answer comes with reasons.

The first conversation is with our Client Advisor. It covers what you are raising and the timeline you are working to, and it is held by video and in confidence.

HOW A MANDATE BEGINS

1

First conversation

By video with Abbas Chothia, our Client Advisor, in confidence.

2

Senior review

David Hunter and Anas Ansar review the raise. The answer comes with reasons.

3

Proposed approach

A call with David Hunter and Abbas Chothia on positioning, order of approach and structure.

4

Engagement

The scope is set in writing and signed by Anas Ansar on the firm's behalf.
